Searching Multi-page Documents is Frustrating

Long “laundry lists” effectively hinder relevant content discovery

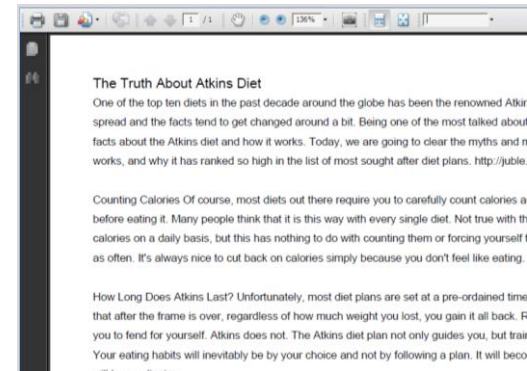

Search

Download

Search again

Ever been frustrated to find the right slides or pages from existing material to a presentation or a document you are putting together?

Traditional Search Result Display

Difficult to verify if the results really meet the criteria

Need to download, open and view documents 1 by 1

Need to do another search within the document

Search results (and accuracy) is in document level, treating equally short HTML pages and documents with tens of pages

Keywords are highlighted in text summary, visual context not available

Cached HTML preview without graphics offered as a side product of document crawling/indexing.

Viewing documents requires 3rd party viewers/tools

There is Better Way to Search Multi-page Content

Visual Search User Experience

No need to have content specific viewers/tools for initial screening of the document.
Selected document can be found visually without downloading and opening it.

Thumbnail view provides immediate overview of the search results

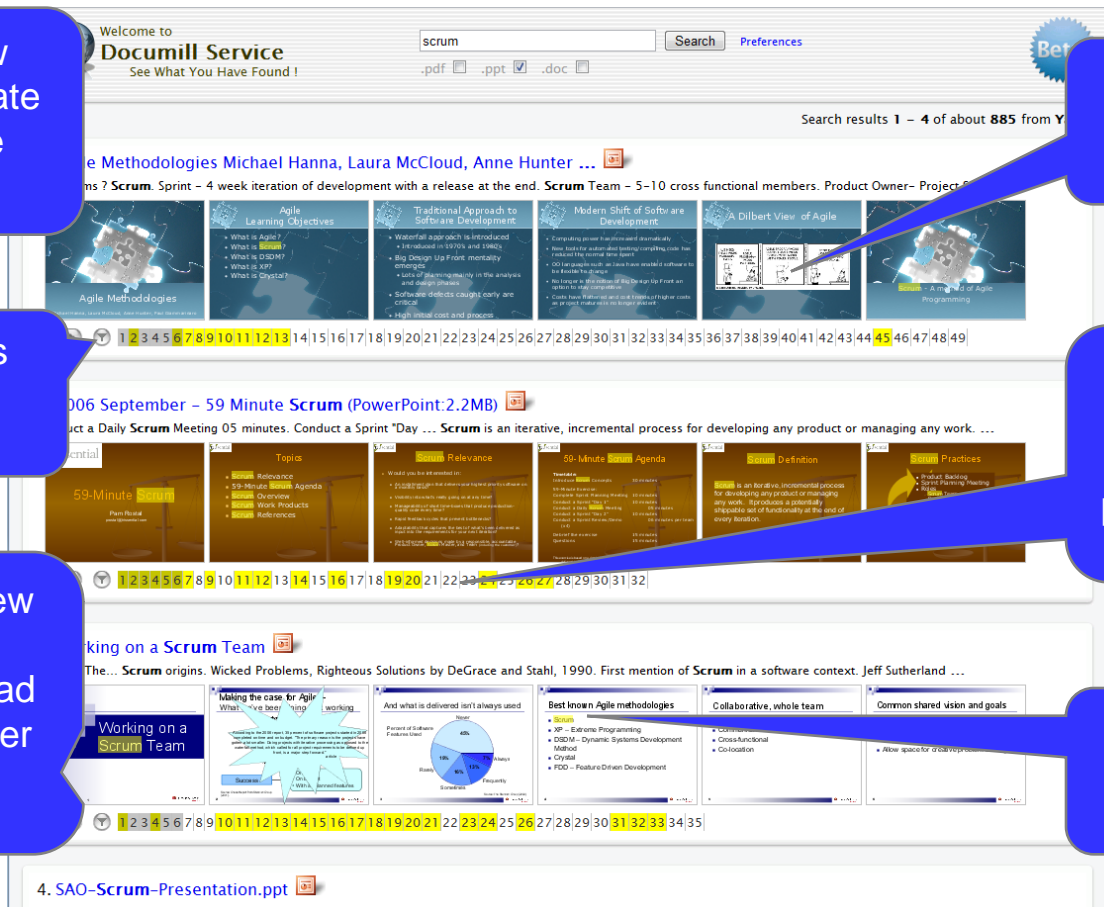

Instantly zoomable page previews from thumbnails

Filter only pages with matching content visible

Ribbon view for understanding page context and quick preview of the whole document

Simultaneous view of multiple documents instead of just one – faster relevancy verification

Keywords are highlighted even in the thumbnails

Documill Visual Search

See what you have found!

- Enhanced user experience
 - Enterprise search solutions
 - Enterprise document management systems
 - Intranet document repositories
- Visual fidelity
 - Preserve original attachment layout to the greatest detail
 - Multiple output format alternatives
 - Optimize the preview file size to minimize download time
- Easy deployment
 - Hosted SaaS, or customer on-site server deployment
 - Flexibility to choose scalable and affordable hardware platform
- Scalable
 - Server-side solution, only browser is needed.
 - Supports on-demand or background preview creation and caching
 - Stateless preview engine for maximum scalability
- Supported formats today
 - MSOffice up to Office 2007
 - PDF up to v1.6, selected features
- Integration alternatives
 - Deploy with any search solution having an open API available
 - SOAP/XML API integration
 - HTML proxying

About Documill

- Documill is an independent software vendor (ISV) enabling browser-based access to MSOffice and PDF documents and server-side content processing solutions.
- Documill's core personnel has worked together in various digital media ventures over ten years.
- Our core competency is server-side enterprise document processing.
- We are located at Innopoli 2:
Tekniikantie 14
FI - 02151 Espoo
FINLAND - EUROPE
