Searching Multi-page Documents is Frustrating

Long “laundry lists” effectively hinder relevant content discovery

Ever been frustrated to find the right slides or pages from existing material to a presentation or a document you are putting together?

Visual Search for SharePoint

Normal search result list

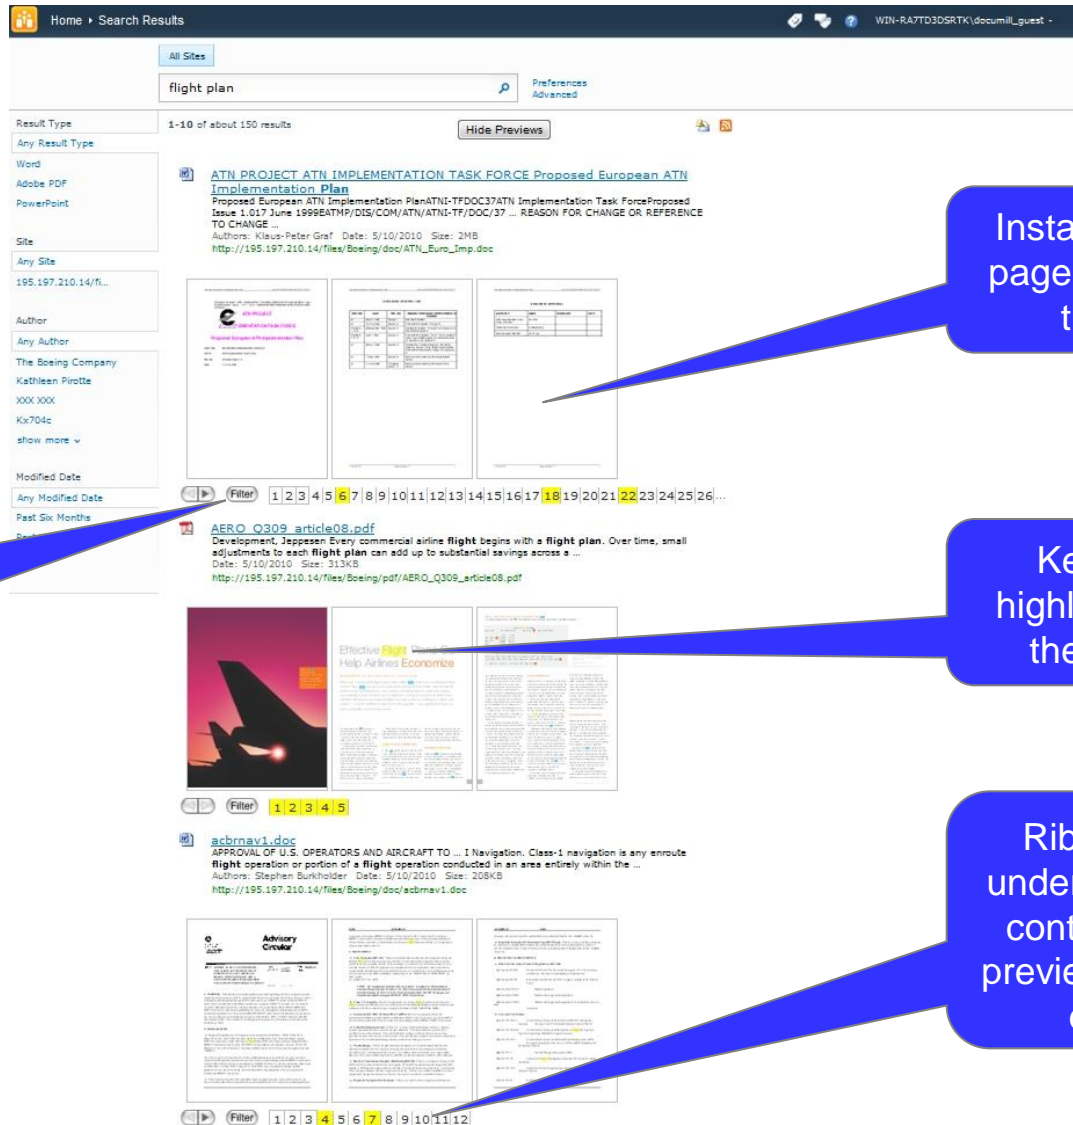

The screenshot shows a standard SharePoint search results page. The search term 'documill' is entered in the search box. The results list contains several entries, each with a document icon, a title, a description, authors, date, and size. The entries include 'Documill Dynamo', 'Enhancing e-Discovery Experience with Documill Visual Search', 'Presentation', 'Company Presentation', 'Visual Search Flyer', and 'Visual Search - Fast discovery of relevant information'. A 'Show Previews' button is visible above the results list.

Documill Visual Search enabled

The screenshot shows the same SharePoint search results page for 'documill', but with visual search enabled. The results list is identical to the normal view. However, the first result, 'Documill Dynamo', is expanded to show a preview of the document. This preview includes a thumbnail image of a man presenting, a title 'Documill Dynamo', and a brief description. Below the preview, there are navigation controls like 'Filter' and a numbered list '1 2 3 4 5 6 7 8 9'. The second result, 'Enhancing e-Discovery Experience with Documill Visual Search', is also expanded to show a preview of a whitepaper with a title, authors, date, size, and a thumbnail image of the document's content.

Visual Search User Experience

Thumbnail view provides immediate overview of the search results

Filter only pages with matching content visible

Simultaneous view of multiple documents instead of just one – fast relevancy verification

Instantly zoomable page previews from thumbnails

Keywords are highlighted even in the thumbnails

Ribbon view for understanding page context and quick preview of the whole document

Faster Way to Read Documents

Aviation and the Environment
14 / 25

Documill with SharePoint 2010

Documill Offering for Microsoft Sharepoint 2010

1. Search result set preview – Documill Ribbon View

- See what you have found without having to download those documents
- Get a good overview of your findings prior drilling into those which look most promising
- Quickest way to find those pages which matter most

2. Online document viewer – Documill Viewer

- No need to download and open open documents with some 3rd party viewer; use browser instead
- Fastest way into the content
- Secure way to view documents which might contain harmful payloads

Visual Search within Sharepoint Services

1. Preview search results

- Immediately see what you have found
- Enhance accuracy by providing page-level search results
- Discover all those enterprise documents Sharepoint has indexed
- Typically integrated into Enterprise Search Center (ESC)

2. Preview file listings

- Visualize content in file listings; often key part of any intranet collaboration size, or user profile pages
- Speed up the selection of right document file
- No need to download documents

3. Online document viewing

- Enable any linked document within Sharepoint to be instantly viewed; without having to download the document first
- View enterprise documents with browser; as part of standard Sharepoint experience
- Fastest way into the content
- Secure way to view documents which might contain harmful payloads
